ART. 2
Educational objective and employment opportunities

Joining the Sustainable Finance Master will allow students to gain valuable competences in managing finance and business governance in the most sustainable way, as to protect the environment, increase social well-being and creating value for shareholders in the long-term. Joining the Sustainable Finance Master will allow entrepreneurs to gain valuable competences in planning their sustainable business, reviewing the financial budget, raising money on the market more easily, creating new jobs, innovation and well-being and wealth in a sustainable manner. The transition to a sustainable economy will require manager to re-think several business practices. The ability to transform their business and to adapt to rapidly changing external conditions will be a key asset for corporation to sustain their competitive advantage. Joining the Sustainable Finance Master, our graduates will not only acquire the skill to lead this change, but will become major promoter of such changes in their corporations. Through continuous interaction with practitioners during the program (Learning by practitioner), will learn how sustainability is changing finance in major national and international companies. The testimonials will inspire our graduates to envisage substantiality as a source of competitive advantage if properly managed. Finance has always undertaken a looking-forward approach. This attitude will be more- than-

ever key to make the transition to a sustainable economy real. Joining the Sustainable Finance Master, graduates will develop a looking forward aptitude, will consider their corporations as a key element of the ecosystem, and will be well-aware of the sustainability implication of their business decisions.

Employment opportunities:

Corporate managers, Analysts, Asset manager, Asset managers, bankers, consultants specialized in sustainability and ESG issues, Risk managers, Invest relator manager in listed companies specialized on non-financial communication.

The programme will be provided in English.

ART. 3 Teaching content and organisation

The Master will begin in **October 2023** and will end in **November 2024**.

In today's markets, the success of a business is not measured solely in terms of value generated for the shareholders; instead, a holistic approach, able to measure the shared value generated, is essential. Sustainability is increasingly a challenge for companies, which need to redesign their current business around the concept of sustainability or completely rework their current business models. The programme will reveal the interdependencies between business finance and sustainability, how sustainability is changing the financial markets and asset management according to the new regulations on ESG issues and how finance can favour investments and sustainable companies.

The students will be able to:

- Acquire knowledge of the rules and regulations on sustainable finance (EU and Italy);
- Understand non-financial reporting: practices and standards;
- Describe and apply the best practices in ESG issues; Assess asset and investment opportunities, explicitly taking account of sustainability;
- Integrate ESG and sustainability into asset management and capital collection;
- Estimate the social impact of financial decisions.
